

MONTECH®

CONVEYORS

Montech AG has stood for innovation in the automation industry since 1963. As a global player with headquarters in Switzerland, we base our success on maintaining flexibility and closeness to customers around the world.

Montech offers ordinary and configurable conveyors in three different versions and an asynchronous conveyor system.

The products are based on our many years of experience and are known for their high quality in almost every industry.

By visiting www.montech.com, you can access our Conveyor configurator, in two versions

On the basis of your specific requirements and desires the **Product Based Configurator** proposes a conveyor according to the «**Best Price principle**». All necessary data for the solution of your requirements of transportation are queried in linear order. False configurations are excluded in advanced by conducting a plausibility check by the program.

If you already know which type of conveyor you need; you will choose the **Conveyor Based Configurator** option.

Upon completion, a quotation will be delivered by e-mail. If you choose to order, simply sign the order form and fax it to us.

COMPONENT KITS

A novel concept from Montech: **conveyors as component kits.**

All parts of the component kit are available from stock (except for belts and sliding plates – these are provided also by the customer). This concept offers you more flexibility in the construction of conveyors, in the adaptation of our conveyors as customer-specific solutions and in assembly – of course we also still supply completely assembled conveyors.

OUR SERVICE PACKAGE

Simple mounting instructions

Training of your personnel

Internet support

For the high-quality component kits, we provide simple **assembly instructions** and our complete CE-compliant **operating instructions**.

You can download all **2D and 3D construction data** of the conveyors free of charge from our website.

We will support you with thorough training of your assembly personnel for assembly of the conveyors.

We look forward to cooperating with you. Call us. Phone +41 32 681 55 00, www.montech.com, info@montech.com or Phone USA +1 704 655 6400
